

Jewelry Master Patterns & Prototypes

Versatile high contrast gray resin

PRODUCTION

PROTOTYPING

FIGURE 4

Figure 4® JEWEL MASTER GRAY

PROPERTIES:

High heat deflection temperature (up to 300 °C) compatible with a range of silicones

Stunning surface finish and excellent print quality available in 30 µm and 50 µm build styles

High contrast gray color shows fine details

Meets biocompatibility standard ISO 10933-5 for cytotoxicity

GOOD FOR:

- High definition master patterns for silicone and RTV molds
- Extended try-ons and fit tests
- Snap-fit and stone-in-place testing
- Design and functional prototyping
