Proto-reactive resins designed in the laboratory for **highly defined** and **resistant printing**. They occur in liquid form but are photosensitive: when laser (SLA) is applied, they solidify.

Here are the resins available in 3DE-SHOP: **Rigid, Flexible, Elastic, Durable, Tough, Black, White, Grey, Grey Pro, Dental Mode, Dental LT, Dental SG, Castable** and **Castable Wax**. Committed for production of Digital Dentistry and Jewelry, Design and Engineering.
